# THE AMA STORY

**A DEDICATED ARCHITECTURAL TEAM FOR PROJECT BASED MATERIAL SOLUTIONS**

**IN-HOUSE ROOF AND WALL CLADDING EXPERTS**

**PERSONALISED SERVICE AND SUPPORT FOR ALIGNED STOCKISTS AND SPECIFIERS**

**ABLE TO MANUFACTURE ROOF AND WALL PANELS, IF REQUIRED**

Established in 2012, Architectural Metals Australia (AMA), is expanding material design freedom across Australia and New Zealand. AMA import Italian made sheet metal, designed specifically for architectural applications.

AMA is the brainchild of Victorian based rainwater goods manufacturer, Bayside Flashing & Ventilations Pty Ltd and sister company, Metal Cladding Systems Pty Ltd. Towards the end of 2011, leadership teams from both businesses began to pool their 30 plus years' of experience. They started researching what their local cladding industry was lacking, identifying potential opportunities to better contribute.

After analysing their own experiences, speaking with peers, installers, builders, and design professionals, they discovered quality products were abundant but material diversity and reliable onshore stock, was not.

Today AMA is a rapidly expanding distribution business, providing sheet metal solutions for those who seek individuality.

## WHY MAZZONETTO SPA AND ZINTEK SRL?

AMA's production partnerships were carefully selected and qualified to ensure each manufacturer matched or surpassed technology expectations, product performance prerequisites, and aesthetic individuality. AMA works with like-minded businesses who believe in creating unique materials, supported by superior levels of service.

Trusted distribution alliances with Mazzonetto Spa and Zintek Srl means reliable local stock management, high calibre technical product understanding, continual material development, and access to Italy's finest artistic metal coils.

# THE COLLECTION

AMA offers a metal range designed specifically for European style roof and wall cladding profiles. Most commonly Vestis and zintek® are specified and folded into Standing Seam, Interlocking, Nailstrip, and Flatlock systems. Material has also been supplied for custom artistic features and metal work projects.

All materials hold an A1 fire rating. This European standard means Vestis aluminium and zintek® zinc satisfy non-combustibility requirements.

**Samples available on request.**

Vestis Copper

Vestis Aged Copper

## VESTIS ONE

Vestis One, Mazzonetto Spa's K2 range of pre-painted aluminium offers artificial patina patterns, matte surfaces, and semi-gloss options. Vestis One is curated each year by AMA's in-house design consultant to ensure stock adequately reflects current trends.

During 2015, in partnership with Mazzonetto Spa, AMA co-designed Vestis Black Graphite. A low-maintenance, robust alternative to black zinc, and a spectacular matte pre-coated aluminium product in its own right.

Vestis One's 35 micron coating ensures UV stability, and surface durability.

Coil width: 1200 mm

Thickness: 0.80 mm

Material hardness: H 44

Coating: High durability polyester paint

Warranty: 40 years\*

\*Non-stock colours available on request. Import lead times and charges apply.

\*All finishes available in stucco surface texture. Import lead times and charges apply.

\*Warranty subject to project location and application.

Vestis Testa Di Moro

Vestis Dusty Grey

Vestis Anthracite Grey

# VESTIS NEBULA

Vestis Nebula is an exciting development in pre-painted polyester coatings. Nebula Midnight, Nebula Luna, and Nebula Storm, posses 3D qualities. However once installed they appear matte, evoking spectacular material depth and body. Nebula is modern sophistication paired with unexplainable magic.

Coil width: 1200 mm

Thickness: 0.80 mm

Material hardness: H 44

Coating: High durability polyester paint

Warranty: 40 years\*

\*Warranty subject to project location and application.

## ZINTEK® ZINC

zintek® zinc was AMA's first imported product. Its unique etched surface set an aesthetic and quality precedent for future material selection. zintek® offers an incredible natural aspect and is exclusively manufactured by Zintek Srl in Italy. zintek® easily folds into multiple roof and wall cladding profiles and is a project focal point on every installation.

Coil width: 1100 mm

Thickness: 0.80 mm

Material hardness: HV 45

# MAKING AVAILABILITY WORK

There's nothing worse than waiting for something you need. That's why AMA aims to deliver in-stock coils, next day for Victorian metro customers and between two and four days for all other states and territories.

Strategic supply and freight partnerships enable AMA to effectively manage stock levels; accommodating European lead times, with no inconvenience to customers.

Collaborative relationships with Australian and New Zealand stockists, means AMA can offer tailored service packages, catering to each businesses individual needs.

**Exclusive European distribution  
partnerships with a trusted local  
supply network.**

**AMA, expanding creative  
material availability.**

**A solution for those seeking individuality.**

## **CONNECTED, FROM CONCEPT TO COMPLETION**

AMA views construction as a whole. Trusted relationships, active industry networking, and accurate project involvement, are equally important as distributing quality architectural products.

AMA is a division of Bayside Metal Industries; a sister business to Bayside Flashing & Ventilations Pty Ltd and Metal Cladding Systems Pty Ltd, AMA is backed by some of the plumbing and cladding industry's oldest and largest local production teams. Collectively, AMA staff have more than 100 years' sheet metal and construction experience, making AMA's service as unique as their product offering.

Specification, account management and marketing teams, work directly with customers, architects, builders, developers, installers, and manufacturers, to ensure when individuality is sought, AMA is there.
